Art Unit: 1625

DETAILED ACTION

1. Claims 1 through 16 are pending. Claims 1 through 6, and 9 have been amended. Claims 12 through 16 have been newly entered. Applicants' claim to foreign priority from application UNITED KINGDOM 0301259.8 filed January 20, 2003 is acknowledged.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 9, 10 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Haeberlin et al. (WO 97/38689, October 23, 1997).
- 4. Claims 9 is drawn to a pharmaceutical composition in the form of tablets comprising crystals of an acicular drug substance with an aspect ration of 10:1 to 1:1 and/or a bulk density above 200 kg/m³ for use as a pharmaceutical. Claim 10 is drawn to crystals of mycophenolic acid or mycophenolate salt specifically, with an aspect ration of 10:1 to 1:1 and/or a bulk density above 200 kg/m³ for use as a pharmaceutical. Claim 16 is drawn to a pharmaceutical composition in the form of tablets, comprising crystals of a process for recrystallising an acicular drug substance comprising suspending said crystals in a solvent system having an effect on the crystal habit and subjecting said suspension to a temperature oscillation.

Art Unit: 1625

7.

5. Claims 9, 10, and 16 are obvious over Haeberlin et al. for the following reasons. Haeberlin et al. teach a mycophenolate sodium salt in a pharmaceutical composition (see page 2, lines 5 through 15; page 3, lines 1 through 6). The mycophenolate sodium salt is an acicular drug substance. While the instant specification teaches a modified crystal habit for an acicular drug substance (mycophenolate salt specifically), there is no evidence that the modified crystalline morphology possesses any different pharmacological properties than that of the salt taught by Heaberlin et al.. Therefore the acicular drug substance (mycophenolate) of the pharmaceutical compositions of the instant claims and that taught by Haeberlin are considered to be the same drug substances, and thus the same compositions.

Claim Rejections - 35 USC § 112

- 6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 7. Claims 7 through 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 8. Regarding claim 7, the phrase "and/or" renders the claim(s) indefinite because the claim recites elements in both the inclusive and in the alterative, thereby rendering the scope of the claim unascertainable. See MPEP § 2173.05(d).
- 9. Claims 8 through 10 are rejected due to their dependency on rejected base claim

10. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to David E. Gallis whose telephone number is 571-272-

9068. The examiner can normally be reached on Mon-Thur 8:30-7:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Janet Andres can be reached on 571-272-1600. The fax phone number for

the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a

USPTO Customer Service Representative or access to the automated information

system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
